

The Medical Eye Center / Dr. Gagan J. Singh, MD

EYE MEDICATIONS

Your doctor has given you eye drops to use. After instilling the drops, please keep your eyes gently shut for at least 3 minutes. This will prevent the medication from following the tears into the nasal passage and then into the throat where they are eventually swallowed.

If you are using more than one drop:

Drops must be separated by at least 3 minutes. Instilling a second eye drop immediately after the first, will only wash out the first eye drop. The eye can only hold one eye drop at a time.

PLEASE BRING ALL OF YOUR EYE MEDICATIONS WITH YOU AT EACH VISIT AND USE YOUR DROPS AS YOU NORMALLY WOULD DO ON THE DAY OF YOUR APPOINTMENT.

MEDICINE	COLOR OF CAP	WHICH EYE	TIMES PER DAY
PREFORTE	PINK	RIGHT / LEFT	EVERY ____ HOURS
